JS4000 Concrete Mixer

4.0 m³ twin-shaft mixer · The mixer fitted to HZS240 batching plants

Parameter	Value
Model	JS4000
Category	JS series forced twin-shaft concrete mixer
Discharge capacity	4.0 m³ (4,000 L) per batch
Practical output	140–170 m³/h
Motor power	90 kW (2 × 45 kW)
Mixing cycle	60 s
Max aggregate	60 mm (pebble) / 80 mm (crushed stone)
Discharge height	3.2 m (customizable)
Weight	approx. 12.0 t
Certification	ISO 9001, CE

Power supply: the mixer is built to the voltage and frequency you specify at order. Star-delta starting is standard; a soft starter or VFD can be specified where the supply is weak or the utility limits starting current. A generator must be sized on starting current, not on the rated running load.
